Allowable Subject Matter

As applicant pointed out under Remark section, pages 8-17, Hunt (US 6,539,422 B1) taken either singly and/or in combination with other cited prior arts, do not teach operating an administration module in conjunction with the module server, the administration module providing a plurality of module administration interfaces that can be remotely invoked to administer the plurality of different storage area network management modules, the plurality of module administration interfaces including at least one description interface allowing remote access to descriptive information related to one or more storage area network management modules operating in conjunction with the module server in the storage area network management application in the computerized device; receiving a remote invocation of at least one of the plurality of module administration interfaces to remotely administer at least one of the storage area network management modules serviced by the module server; and applying module administration functionality associated with the at least one remotely invoked module administration interface to remotely administer at least one of the storage area network management modules serviced by the module as recited in such manners in each of independent claims 1, 14, 27 and 28.
